The TeknoPlus system guarantees a precise and easy regulation of the anti-vibration mount: simply adjust the square end of the screw, tightening the lock-nut.

**Material:**

**Base:** Painted steel with galvanized steel screw

**Pad:** rubber NBR 75 shore (for higher loads, an anti-vibration pad 90 shore can be supplied.)

**Application:** machine tools; presses; injection molding machines; shearing machines

Leveling is provided with 2 nuts, 1 plain washer and 1 toothed washer

Load values mentioned above refer to static conditions calculated at half of the screw length. In conditions of vibrations or in presence of dynamic loads these values should be reduced. We cannot accept responsibility for mounts that have been tampered or modified.
